

IN THE SPECIFICATION

The title has been amended to read as follows:

--PRINTING APPARATUS AND METHOD FOR NO-MARGIN

PRINTING--.

Please replace the paragraph at page 7, lines 13-21, with the following amended paragraph.

With this arrangement, print data outputted by the input section 111 is stored in the input buffer 112. One page of print data from the input buffer is inputted to the dividing section 113. The dividing section ~~[[114]]~~ 113 then divides the one page of print data in accordance with the division numbers J and K indicated by the instructing section 114. The dividing section ~~[[114]]~~ 113 then outputs the pieces obtained by the division to the printing section 115 as a plurality of print images.
